

Pizza Survey 2014 - Supermarket Pizzas

Data table sorted by highest salt per 100g

Notes:

Salt per 100g information was collected in store and online September/October 2014. See CASH website for further information.

Salt calculated from sodium where necessary

Colour coding according to DH FoP Guidance: Green ≤0.30/100g, Amber 0.30-1.50g, red >1.50g /100g, >1.8g/portion

Where values were only given per 100g, and product size was known, salt per pizza was calculated
