## Salt and health

Eating too much salt can damage your health. A high salt diet will slowly raise your blood pressure which increases your risk of heart disease and stroke.

*Adults should eat less than 5-6g of salt a day and children much less.*

### Blood pressure

Blood pressure is the biggest cause of death in the world through the strokes and heart attacks it causes. High blood pressure, also known as hypertension, is considered to be a 'silent killer' because many people with high blood pressure have no symptoms and don't realise they are at risk of serious health problems. Salt slowly puts up our blood pressure and eating too much is responsible for many thousands of strokes, heart attacks and heart failure deaths each year worldwide. People of South Asian and black African descent are particularly susceptible to high blood pressure

*Eating less salt lowers blood pressure and reduces the risk of heart disease and stroke.*

### Heart attacks and heart failure

Raised blood pressure is a major risk factor for coronary heart disease, stroke and heart attacks. Coronary heart disease is the commonest cause of death in the UK. Untreated high blood pressure can also lead to heart failure, which can make the pumping action of the heart less effective. People of South Asian descent are prone to coronary heart disease.

*Preventing high blood pressure will reduce the risk of heart attacks and heart failure.*

### Stroke

High blood pressure is the single most important risk factor for stroke. Salt is therefore directly responsible for many of these strokes. There is also increasing evidence that salt may have a direct effect on strokes, independent of and in addition to the effect it has on blood pressure. People of black African descent are at a higher risk of stroke.

### Osteoporosis

Salt intake is the major factor controlling the amount of calcium in the urine and the amount of calcium lost from bones. As calcium is vital for bone strength, high salt intake may lead to weakening of the bones and an increased risk of osteoporosis. If we do not achieve the maximum strength of our bones when we reach our mid to late twenties, our risk of developing osteoporosis later in life is increased. Low salt intake in childhood, adolescence and early adulthood is therefore important for bone health.

*Osteoporosis leads to bone fractures and breakages.*

### Obesity

Obesity is an increasing problem globally. Whilst salt is not the cause of obesity it increases thirst and the amount of fluids consumed, particularly sweetened soft drinks. A reduction in salt intake would cause a major reduction in the number of sweetened soft drinks being consumed, both by adults and children. Studies in the UK have shown that a reduction in sweetened soft drink consumption is likely to reduce the number of children developing obesity.

### Stomach cancer

Salt, particularly in high concentrations, damages the delicate lining of the stomach. This makes it more vulnerable to infection by *Helicobacter Pylori*, a type of bacteria that causes both stomach ulcers and stomach cancer.

### Kidney stones & kidney disease

Reducing salt intake has been shown to reduce calcium excretion and reduce reoccurrences of kidney stones, as kidney stones have calcium as their basic constituent.

High blood pressure has been shown to increase the amount of protein in the urine which is a major risk factor for the decline of kidney function, and a high salt intake may increase how quickly kidney disease progresses. In addition, the water retention that occurs with a higher salt diet will increase blood pressure which also increases the risk of kidney disease. People of South Asian and black African descent are at particular risk of kidney disease.

### Other effects

A reduction in salt intake may also be beneficial for keeping a number of other conditions under control, such as asthma and Ménière's disease. Salt reduction is recommended for people with diabetes because keeping blood pressure in the healthy range helps to reduce your risk of the long term complications of diabetes. A high salt diet can also lead to water retention. Many people with water retention, including women with premenstrual water retention, find considerable improvement in their symptoms by reducing their salt intake.

**Too much salt raises blood pressure, leading to heart disease and stroke.**

**Visit your doctor or nurse to get your blood pressure checked.**

**Normal blood pressure: 120/80mmHg**

## Who is at risk?

Certain groups of the population are particularly sensitive to the effects of too much salt. They are at a higher risk of developing high blood pressure and other health problems related to a high salt intake and they need to take particular care to keep their salt intake to a minimum and lead a healthy lifestyle. These groups include people of black African and South Asian descent. World wide, other vulnerable groups are children, as blood pressure and the risk of future health problems can be influenced from a young age; men, due to a higher risk of heart disease; and the elderly, as blood pressure increases with age.

## What can you do?

The good news is that with simple diet and lifestyle changes, such as improving your diet, increasing exercise and reducing alcohol consumption, you can make a big improvement to your health.

*Reducing your salt intake will significantly reduce your risk of developing health problems.*

### Salt in your favourite foods

Salt can be found where you least expect it. Most of the salt we eat is hidden in the food we buy, particularly processed foods such as ready meals, pizza, bread, pasta and curry sauces, baked beans and sausages. Almost everyone eats at least some of these types of foods, so it pays to cook food yourself from scratch. Salt can quickly add up throughout the day so think about what's in every meal and snack, not just your evening meal.

*We are all eating too much salt. The good news is that it is easy to cut down on salt!*

### Labelling

Many countries now have product labelling making it possible to check the salt content of the food we buy in supermarkets and shops. By looking at the label we can add up how much salt we are eating each day. If the label only gives the sodium content, you need to multiply sodium by 2.5 to get the salt content.

## Sodium per 100g = 2.5g of Salt per 100g

Try to think about how much of the food you will eat. If the label doesn't give portion information, use the size of the packet as a guide – is this more or less than 100g? From this you can work out the salt content of the portion you will eat.

### Adjust to less salt

The salty taste of foods depends not only on the salt content of the food but also the sensitivity of the taste receptors in your mouth. Initially when you reduce your salt intake foods tend to taste bland, but after two or three weeks your taste receptors become more sensitive, getting the same effect from lower levels of salt and you will start to taste the real delicious flavour of natural food. Give yourself time to adjust.

### Cooking at home

Try cooking your favourite meals at home more often, use the low salt recipes in this book to make a drastic reduction to your salt intake.

- Don't add salt at the table or during cooking!
- Don't add salt to the water you use for cooking vegetables, pasta and rice.
- Sea salt, rock salt and garlic salt should also be avoided as these are just as harmful as table salt and cooking salt.
- Avoid salty sauces such as soy and chilli sauce and tomato ketchup. Look out for reduced salt versions or use sparingly.
- Choose low salt stocks, gravies and sauces, or better still, make your own.
- Use fresh, frozen or dried herbs, spices, chilli, garlic, pepper, vinegar, wine or lemon or lime juice to add flavour instead.
- Any salted meat or fish e.g. salt fish, salted mackerel, saltbeef, khobi, salted pigs tail should be soaked in water for 24 hours (changing the water a number of times) to remove most of the salt before cooking. Better still, eat fresh unsalted meat or fish.
- If using a very salty ingredient such as olives or anchovies, try using only a small amount.
- Look out for words on labels like sodium, salt, brine, cured, pickled, corned, smoked, soy sauce on labels – and only eat limited amounts of these products.

## Crêpes with raspberry sauce

A wonderful weekend breakfast. These crêpes also make for a light, summery dessert.

1 Place the flour in a large bowl and whisk in the egg, milk and low fat spread until the batter is smooth. Chill in the fridge for 1 hour.

2 Preheat the oven to 120°C/250°F/gas ½.

3 While the batter is chilling, set aside a few raspberries for each portion. Place half the remaining raspberries into a saucepan with a teaspoon of water and sprinkle over the teaspoon of sugar. Cook the raspberries over a medium heat for approximately 5 minutes, breaking them up with a wooden spoon. Reduce the heat and allow the sauce to thicken; this will take about 5 minutes. Add the other half of the raspberries and gently heat until they are warmed through but whole.

4 Grease a non-stick frying pan with a little spread and place over a medium heat. Ladle about 3 tablespoons of the batter into the pan and swirl it so that it is covered with a thin layer of batter. Cook for about a minute, running a spatula around the edge of the crêpe to lift it away from the edges. Shake the pan to loosen the crêpe and flip it over. When cooked, transfer to a plate and keep warm in the oven while you cook the rest of the crêpes.

5 Lay a crêpe on to a plate and spoon on some of the sauce. Fold a third from one side into the middle, then a third from the other side. Repeat until you have 8 crêpes. Dust with icing sugar and garnish with a few reserved raspberries.

## Ital carrot and sweet potato soup

Kindly provided by Levi Roots, celebrity chef and food entrepreneur from BBC's Dragon's Den, UK.

"This is one of my favourites and the sort of food I'd feed to my Rasta friends. It's completely ital and, if you're wondering what that is, 'ital' comes from 'vital', or natural. Make it as hot or mild as you like and change the vegetables according to the time of year. But keep it as pure as possible; I like it with no fat (though sometimes butter's hard to resist) with added onions."

### Soup

**Serves: 4**

**Prep time: 15–20 minutes**

**Cooking time: 10–15 minutes**

**1 litre carrot juice (I juice them fresh in a juicer)**

**2 sweet potatoes, peeled and cut into 2cm chunks**

**1 x 400g can chickpeas, drained**

**4cm chunk of creamed coconut, from a block**

**1 small hot red chilli (ideally Scotch bonnet), chopped (seeds left in or removed, depending on how hot you like it)**

**2cm piece of fresh root ginger, very finely chopped**

**1 garlic clove, finely chopped**

**Leaves from 2 sprigs of thyme, finely chopped**

**Large handful of callaloo or spinach leaves, washed thoroughly, tough stalks removed (optional)**

**Black pepper (optional)**

**1 tablespoon chopped fresh coriander leaves, to garnish**

**Low fat sour cream or Greek yogurt, to serve (optional)**

**1** Put the carrot juice in a medium-sized saucepan and bring to the boil. Add the sweet potatoes, chickpeas, creamed coconut, chilli, ginger, garlic and thyme.

**2** Simmer gently, covered, for 10 minutes or until the potato is soft. Shred the callaloo or spinach, if using, and add to the soup 5 minutes before the end of cooking time. Leave the soup chunky or smash up the chickpeas and sweet potato with a potato masher if you want. (Adjust the consistency of the soup to taste with a little extra carrot juice or stock if you decide to mash it, as it will become very thick.)

**3** Season with black pepper, if liked and garnish with fresh coriander. Serve each bowl with a blob of sour cream or Greek yogurt on top, if liked.

## Thai-style mushroom and noodle soup

Kindly provided by Anne Diamond, journalist and health campaigner, UK.

This is an authentic Thai-style soup which is both soothing and full of flavour. It's also surprisingly quick and easy; it'll be ready in well under half an hour.

1 Whizz the lemongrass, chilli, ginger, garlic, lime leaf and 2 tablespoons of water in a food processor to form a paste.

2 Heat the stock in a sauce pan over a medium heat and bring to the boil. Add the blended spice paste and boil for a 2–3 minutes.

3 Meanwhile, cook the rice noodles according to the packet instructions, drain and rinse with cold water to prevent them from sticking.

4 Stir the coconut milk into the soup, add the mushrooms and soy sauce and continue to cook for 3–4 minutes. Finally, stir in the lime juice.

5 Divide the cooked noodles into 4 bowls. Ladle the soup over the noodles and garnish with the coriander, spring onion or chilli.

### Soup

Serves: 4

Prep time: 15 minutes

Cooking time: 10 minutes

1–2 stalks lemongrass, tough outer layers removed, roughly chopped  
1–2 small chillies, or to taste, roughly chopped  
2cm piece ginger, peeled and roughly chopped  
3 garlic cloves, peeled and roughly chopped  
3–4 kaffir lime leaves, torn into pieces, stem discarded, or zest of 1 lime  
Approx 2 tablespoons water  
1 litre low salt vegetable stock, made up  
300g rice noodles

1 In a large bowl, mix together all the ingredients except the oil. Mash until fairly smooth.

2 Take a spoonful of the mixture, the size of a golf ball, and flatten it to make a burger shape. Repeat with the remaining mixture.

3 Heat the oil in a heavy-based frying pan and lightly fry the patties for 2 minutes on each side, cooking them well. Drain on kitchen paper. Serve hot.

**Serves: 4 as a starter, 2 as a main**  
**Prep time: 20 minutes plus 2 hours**  
**refrigeration**  
**Cooking time: 20 minutes**  
.....

***For the fish cakes***

**500g of white fish fillets, skin removed**  
**1 tablespoon Thai red curry paste see**  
**page 69**  
**Zest of half a lime**  
**1 thumb size piece of ginger, finely**  
**chopped**  
**50g green beans, topped and tailed and**  
**finely sliced**  
**1 egg, beaten**  
**1 tablespoon oil (ground nut or**  
**rapeseed)**

***For the dipping sauce***

**3 tablespoons sugar, brown**  
**2.5 tablespoons vinegar (white wine or**  
**rice)**  
**2.5 tablespoons water**  
**½ tablespoon fresh red chillies,**  
**chopped into rounds**  
**1 tablespoons roasted, unsalted**  
**peanuts, finely chopped**  
**1.5 inches cucumber, finely chopped**  
**into small cubes**  
**Coriander leaves to garnish**

Thai fish cakes are made with Thai red curry paste but this is usually high in salt. By using our low salt curry paste this recipe combines classic Thai flavours without the need for salt.

.....  
**1** Begin by removing any excess moisture from the fish with a paper towel and place in a bowl. Mince the fish with a fork, alternatively, use a food processor but be sure to keep the texture chunky.

**2** Combine the curry paste with the lime zest and ginger. Stir the paste into the minced fish and add all the remaining fish cake ingredients, except the oil, and mix well.

**3** Using your hands, shape dessertspoons of the mixture into small balls, place on a large plate or tray and flatten slightly. You should have 14–16 small fish cakes. Refrigerate for an hour or two so they hold their shape.

**4** Meanwhile make the dipping sauce. Bring the sugar, vinegar, chillies and water to the boil in a saucepan over a medium heat. Once the sugar has dissolved, reduce the heat and simmer very gently, stirring occasionally, until the sauce thickens. Be careful not to allow the sugar to caramelize. Remove from the heat and leave to cool.

**5** When you are ready to cook the fish cakes, combine the sauce ingredients in a bowl and garnish with the coriander leaves.

**6** To cook the fish cakes, heat the oil in a frying pan over a high heat. Allow the oil to heat up and carefully, using 2 spoons, add the fish cakes to the pan. Cook for 2 minutes on each side then drain on some paper towel.

**7** Serve with the dipping sauce, a few lime wedges and a light, green salad of peppery leaves such as rocket, watercress and baby spinach. Garnish with the coriander.

**¼ teaspoon black pepper**

**1 x 425 can mackerel (Jack Mackerel) in  
tomato sauce**

**240ml water**

**Juice of half a lime**  
.....

**Kindly provided by Julian Rowe and Karen Griffith,  
Registered Dietitians, Barbados.**

Cou-cou and steamed flying fish is the national dish of Barbados. Cou-cou is also often served with a sauce made with canned salmon or mackerel or sometimes liver. If flying fish is not readily available in your country, this recipe shows how you can make a wonderful sauce with canned mackerel. Canned mackerel can vary in its salt content so be sure to check the label and choose the lowest salt option.  
.....

### ***To make the cou-cou***

**1** Mix the cornmeal in a bowl with 600ml water to make a smooth paste.

**2** Boil the okras in 720ml of water until soft (2–3 minutes), the saucepan should be only half-covered to prevent the okra boiling over. Strain the cooked okras, reserving the okra water in a separate bowl.

**3** Return the saucepan to the low heat. Add a small amount of the okra water and all the cornmeal mixture and stir. Gradually add the rest of the okra water to the cornmeal mixture, a little at a time, stirring constantly. Stirring the cou-cou (as we say here) takes about 10–15 minutes - it's done slowly and gradually to prevent lumps forming.

**4** After adding the last of the okra water, stir the cooked okras into the cou-cou and cook a few minutes more. Stir just enough to blend the okra into cornmeal. The cou-cou is ready when it breaks away from the sides of the saucepan.

### ***To make the Jack Mackerel sauce***

**1** Spray a saucepan with the no-stick cooking spray and add all the ingredients except the mackerel, water and lime juice. Cook on a low heat until just tender, about 3–5 minutes, stirring occasionally.

**2** Add the mackerel, water and lime juice and simmer for 2–3 minutes. Serve with the cou-cou.

Fish pie is a traditional English comfort food at its best. This recipe shows you how you can keep the flavour without the need to add extra salt and fat.

.....

**1** Preheat the oven to 200°C/180°F/gas 6.

**2** Boil the potatoes for approx 20 minutes or until tender, drain and mash with 1 tablespoon of low fat spread and black pepper.

**425ml Guinness**

**570ml low salt beef stock, made up**

**1** Heat 1 tablespoon of the oil in a heavy based saucepan, add the onion and fry gently until softened, but not browned, then remove onto a plate.

**2** Heat the remaining 2 tablespoons of oil in the pan and fry the steak and kidney in batches until evenly browned. Remove the meat as it browns and set aside with the onions.

**3** Stir the flour into the pan and gradually add the Guinness and low salt beef stock, stirring and scraping any residue from the bottom of the pan.

**4** Return the meat and onion to the pan, adding any juices left on the plate. Bring to the boil, add the bouquet garni, then reduce the heat. Cover and simmer very gently for 2 hours or until the meat is very tender. Add the mushrooms and cook for 10 more minutes.

**6** Preheat the oven to 200°C/400°F/gas 6.

**7** While the beef is cooking, brush a sheet of Filo pastry with olive oil, gently scrunch and place on non-stick baking mat, continue until you have 6 small nests. Cook in the oven for 10 minutes until they are crisp and golden.

**8** Divide the steak and kidney and resulting rich gravy into 6 pre-warmed bowls or pie dishes and top with the Filo pastry nests. Serve with steamed seasonal greens and mashed potato (see page 62).

# Roast pork with apple and maple syrup compot and turmeric roast potatoes

.....  
Main meal: meat and poultry

Serves: 4

Prep time: 35 minutes

Cooking time: 1 hour  
.....

100g black olives, chopped, stones removed

4 cooking apples, peeled and cored

1 tablespoon water

2 tablespoons maple syrup plus 2–3 to taste

Juice of half a lemon

16 baby potatoes (approx 600g), peeled

Approx 9 tablespoons vegetable oil

2 teaspoons turmeric

1 pork tenderloin fillet (approx 500g)

Ground black pepper

6–8 large garlic cloves, peeled and finely sliced

Handful of sage leaves

Nutritional information per serving

Kindly provided by James Nathan, Winner of MasterChef UK, 2008.

“This Sunday roast recipe is perfect for healthy eating. The meat is seasoned with just a small amount of black olives, I use maple syrup instead of sugar and the turmeric is hugely good for you and off-sets the roast potato element. This recipe will make you feel like you’re eating in a restaurant but is in fact simple to follow and user friendly.”

.....  
1 Preheat the oven to 150°C/300°F/gas 2.

2 Whiz the olives in a food processor until finely chopped but not so they form a paste. Set the olives on a baking tray lined with baking parchment and cook in the oven for 20 minutes or until they are dried out. Remove from the oven and set aside. Turn up the oven to 200°C/400°F/gas 6.

3 Meanwhile, chop one of the apples into ½cm cubes and set aside. Finely slice the other apple and put into a pan with 1 tablespoon of water and 2 tablespoons of maple syrup. Cover and cook on a low heat for 10 minutes or until they are soft then whiz to a puree with a hand blender. Add the cubed apples and cook for 5–8 minutes until just soft. Add a squeeze of lemon juice and maple syrup to taste. Keep warm in the lidded pan.

4 While the apples are cooking, bring a pan of water to the boil and par boil the potatoes for approx 7–10 minutes until slightly softened. Drain and shake in the pan to roughen the edges. Meanwhile, add enough oil (approx 5 tablespoons) to cover the bottom of the roasting tray and heat in the oven until shimmering. Remove from the oven and carefully add the potatoes. Add the turmeric and coat the potatoes in the yellow oil. Return to the oven and cook for 25 minutes or until crispy and roasted.

5 While the potatoes are roasting, heat a heavy based, ovenproof frying pan or roasting pan over a high heat. Coat the pork in oil (approx 1 tablespoon) and season with pepper. Sear briefly in the pan on all sides. Roast in the oven for about 7–10 minutes until the pork is just cooked. Remove and keep warm.

6 Shallow fry the garlic in a non-stick pan over a high heat in approx 3 tablespoons of oil until the slivers of garlic are crispy and light brown but not burnt. Remove and drain on kitchen roll. In the same pan shallow fry some sage leaves until they stop sizzling. Drain and keep warm with the garlic slices.

7 To serve, roll the pork in the powdered black olives. Slice and lay on a bed of warm apple compote. Scatter over the garlic chips and sage leaves and serve with the potatoes.

**1 x 400g tin artichoke hearts in water, drained**

**5 sprigs fresh lemon thyme, leaves only (stripped off sprigs)**

## Chicken choyla

Kindly provided by Cyrus Todiwala OBE DL, celebrity chef and patron of Pan-Indian restaurant Café Spice Namasté, UK.

“This is a simple, easy to prepare chicken dish and takes no more than a few minutes provided the mise en place is well carried out. It is a dry preparation and is ideal as a snack or as a main meal with an accompaniment of lentils and rice (see Laapsi khichdi a’la Pervin on page 63) or with other meats and vegetables. Remember that if the heat is maintained at a high temperature the cooking time will be reduced and you will get a great colour and texture.”

.....  
**Main meal: meat and poultry**

**Serves: 4–5**

**Prep time: 12 minutes**

**Cooking time: 10 minutes**  
.....

**1 tablespoon cold pressed sunflower or rapeseed oil**  
**1 tablespoon fresh ginger, pureed or finely minced**  
**1 heaped teaspoon cumin/jeera powder**  
**½ teaspoon turmeric powder**  
**1 level teaspoon chilli powder**  
**1 tablespoon fresh squeezed lime or lemon juice**  
**½ teaspoon garam masala**  
**2–3 tablespoons water**  
**1kg boneless chicken, diced**  
**1 tablespoon coriander, finely chopped**

.....  
**1** Take a large frying pan (big enough to hold all the diced chicken) or a wok and place over a low heat, add the oil and allow it to heat gradually.

**2** Blend in a small bowl the ginger, cumin, turmeric, chilli powder, lime juice and garam masala with 2–3 tablespoons of water to form a smooth paste of pouring consistency.

**3** Bring the heat of the pan to high and when the oil is smoking add the chicken pieces. Toss the pan a couple of times only and allow the chicken to sauté over the high heat for a minute or two. Retaining the heat on high, toss the meat again until the pieces are well sealed and browning, the best tool for this is either a heatproof spatula or a wooden flat spatula. Do not agitate the meat too much as it will release steam and the chicken will stew rather than sauté, allow between three and five minutes to cook on all sides.

**4** Now add the spice mixture and toss well. Be sure not to allow the spices to burn at the bottom of the pan but do not reduce the heat as too much liquid will be released from the meat. Continue to cook for 2–3 minutes, tossing every few seconds.

**5** Sprinkle with the chopped coriander and mix it in well, transfer to a serving bowl or dish to serve.

## Kammy's low salt chicken curry

Kindly provided by Chris Kamara, sports presenter, UK.

"I am a big fan of curries and there is no need to miss out on the great flavours just because we are cutting back on our salt intake. They are relatively easy to cook (thankfully) and they fill the house with such a great aroma."

1 In a frying pan, heat the oil and quickly fry the garlic, bell pepper and onion for 1–2 minutes to release the flavours.

2 Place the potatoes and contents of the frying pan in a crockpot and layer the diced chicken on top.

3 Mix the stock cube with 200ml of boiling water. In a mixing bowl, stir together the chicken stock, chopped tomatoes and spices. Pour over the chicken.

4 Cook on a low heat for 5–6 hours to fully infuse the unbelievable flavours. If pushed for time, one and a half hours will suffice.

5 Stir the cornstarch into the water to make a paste. Turn the heat to high and stir the cornstarch into the curry. Cook for about 10 minutes until the sauce has thickened slightly.

A heart-healthy version of a national favourite, a home-made pizza is a satisfying and delicious alternative to takeaways. For alternative toppings, why not try using onion, mushrooms, pineapple or jalapenos?

.....

**1** To make the dough, mix the flour, yeast and pepper together in a large bowl. In a separate container mix the water with the oil and garlic and pour into the flour and yeast. Mix together quickly with a spoon until a sticky dough is formed. Leave to stand for 10 minutes.

**2** Dust your hands and a work surface with flour. To knead the dough, hold one side of the dough down with one hand, with the other hand, push the other side of the dough away from you, stretching it out. Fold the stretched dough back on top of itself and push it down with your palm. Give the dough a quarter turn and repeat the process for just 1 minute or until the dough is smooth, elastic and bouncy.

**3** Form a ball with the dough and place it into a bowl greased with a little oil. Cover the bowl with cling film and leave to rise in a warm place for about an hour or until the dough has doubled in size.

**4** Meanwhile, make the sauce. Heat the oil in a saucepan over a medium heat and cook the onion and garlic for 5 minutes or until the onion becomes soft and transparent. Stir in the tomato puree followed by the chopped tomatoes, chilli and pepper. Simmer on a low heat for 15–20 minutes until the sauce becomes thick, stir in the basil for the last few minutes. Use a hand blender to make a smooth sauce.

**6** Once the dough has risen, preheat the oven to 240°C/475°F/Gas 9. Dust a baking sheet with a little flour and use your hands to push the dough outwards to form a round base approximately 30cm (12inches) across.

**7** Spread the tomato sauce over the pizza base using the back of a spoon. Scatter the toppings over the pizza, topped with the basil leaves, and cook in the oven for 10–15 minutes or until golden brown. Scatter with the remaining basil leaves and serve.

**8 egg yolks**

**Icing sugar for sprinkling**

A modern twist on a traditional Moroccan pastilla.

Spread 1 tablespoon of the savoury egg mixture on top and sprinkle with the toasted almonds. Fold the Filo pastry over the top of tartlet, brushing the un-covered pastry lightly with egg yolk. Brush the top with olive oil and turn out the pastilla onto a clean non-stick baking sheet. Repeat with the remaining 11 portions.

## Falafel with tomato and cucumber relish

.....  
**Main meal: vegetarian**

**Serves: 6**

**Prep time: 25**

**Cooking time: 1 hour and 30 minutes**  
.....

**6 wholemeal pitta breads**  
**60g salad leaves**

### *For the falafel*

**2 x 400g tin chick peas (no added salt),  
drained**

**3 garlic cloves, peeled**

**1 large onion, chopped**

**1 teaspoon ground cumin**

**½ teaspoon ground coriander**

**Pinch of cayenne pepper or 1 teaspoon  
chilli powder**

**Ground black pepper**

**20g fresh parsley, chopped**

**2 tablespoons lemon juice**

**1 tablespoon olive oil**

### *For the tomato and cucumber relish*

**3 tomatoes**

**½ cucumber**

**150ml low fat natural yogurt**

**1 tablespoon fresh mint, finely chopped**

This is a super healthy version of the popular street food classic. Using drained rather than tinned chick peas keeps the salt content (and the cost!) minimal and with plenty of lemon juice, herbs and spices, there's no need to add any extra. The falafel is baked, rather than deep-fried, so the fat content is instantly reduced making this a heart- and wallet-friendly treat.

.....  
**1** Bring a saucepan of unsalted water to the boil and add the soaked, dried chick peas. Reduce the heat and simmer for one hour or until the chick peas are soft. Drain and leave to cool.

**2** Preheat the oven to 180°C/350°F/gas 4.

**3** Put all the falafel ingredients except the olive oil in a food processor and whiz until coarse; do not allow the mixture to become smooth. If you have time, make the mixture in advance and chill in the fridge for a few hours to allow the flavours to infuse. Form small handfuls of the mixture into 12–16 balls. Wearing plastic gloves makes the falafel easier to handle as they stop it sticking to your hands.

**4** Grease a baking tray with the olive oil and place the falafel balls on it. Bake it in the oven for 30 minutes or until golden brown, turning once.

**5** To make the relish, chop the tomatoes and cucumber into small cubes of uniform size. In a bowl, mix the tomato and cucumber with the soya yogurt and mint. Warm the pitta breads in the oven for a few minutes, not allowing them to go crispy. Serve the falafel with the pitta bread, relish and salad leaves.

## Simple mushroom risotto

.....  
**Main meal: vegetarian**

**Serves: 4**

**Prep time: 10 minutes**

**Cooking time: 25–35 minutes**  
.....

**2 bay leaves**

**Handful dried mixed mushrooms or  
dried porcini mushrooms**

**1.2 litres low salt hot vegetable stock,  
made up**

**2 tablespoons olive oil**

**1 onion, peeled and chopped**

**4 garlic cloves, finely chopped**

**400g chestnut mushrooms, sliced**

**350g Arborio rice**

**150ml dry white wine**

**2 tablespoons fresh parsley, chopped**

**25g low fat spread**

**Ground black pepper**

**Freshly grated parmesan, to serve**

The dried mushrooms infuse this risotto with a wonderful flavour.

.....

**1** Add the bay leaves and dried mushrooms to the hot stock and leave to soak.

**2** Meanwhile, heat the oil in a large, heavy-based saucepan over a low-medium heat. Fry the onion and garlic for 2–3 minutes until softened. Add the chestnut mushrooms and continue to fry gently for 2–3 minutes until the mushrooms are browned.

**3** Stir in the rice, coating it in the oil, then pour in the wine and gently simmer, stirring, until most of the liquid has been absorbed. Add a ladleful of stock (avoiding the mushrooms and bay leaves) and, again, when most of the liquid has been absorbed, add another ladleful of the stock. Continue in this way, stirring continuously, until the rice becomes plump and soft. If more liquid is required, simply add boiling water until the desired texture is achieved.

**4** Roughly chop the soaked mushrooms and stir into the risotto, along with the parsley, low fat spread and pepper. Serve with freshly grated Parmesan and a green salad.

- Make a chicken and mushroom risotto by simply adding some torn, cooked chicken when cooking the fresh mushrooms

**50g pine nuts**

**1 garlic clove, crushed or very finely chopped**

**2 large tomatoes, sliced**

A vegetarian alternative to lasagne which makes the most of the low salt and fat content of ricotta cheese.

.....

**1** Preheat the oven to 190°C/375°F/gas 5.

**2** To make the tomato sauce, heat the oil in a pan over a medium temperature and cook the onion and garlic until soft. Add the red pepper, carrot and tomato puree and cook for a further 5 minutes.

**3** Stir in the chopped tomato, red wine, if using, and black pepper. Reduce the heat and leave to simmer for 20–25 minutes until the sauce has reduced a little and the carrots are cooked through. If you are not using the red wine then cook for 15–20 minutes. Remove from the heat and leave to cool briefly then blend until smooth using a hand blender.

**4** Meanwhile, place the spinach in a saucepan and defrost over a medium heat, stirring occasionally. When the spinach is fully defrosted, drain off the excess water and leave to cool.

**5** Make the spinach and ricotta filling by placing the spinach in a bowl with the ricotta, pine nuts, garlic and nutmeg and mix well.

**6** To assemble the lasagne, place a layer of lasagne sheets in the base of an ovenproof dish followed by a third of the tomato sauce, then half of the spinach mixture. Repeat this process and top with a third layer of lasagne sheets and the remaining third of tomato sauce. Finally, arrange the sliced tomato on top.

**7** Cook in the oven for 30 minutes until the lasagne sheets are cooked and serve with a light, leafy salad.

### **Suggestions**

- Swap the nutmeg in the spinach mixture for 2 tablespoons of chopped mint leaves for a delicious alternative flavour
- Use wholewheat lasagne for a filling and heart-healthy lasagne

## Caramelised onion mashed potato

.....  
**Side dish**

**Serves: 6**

**Prep time: 20 minutes**

**Cooking time: 25 minutes**  
.....

**1.2kg potatoes (charlotte), peeled and chopped**

**1 tablespoons olive oil**

**2 large onions, peeled and thinly sliced**

**50g low fat spread**

**100ml semi skimmed milk or to taste**

**Ground black pepper**

Caramelised onions are a delicious addition to mashed potato.

.....

**1** Rinse the chopped potatoes under cold water to wash the starch off the surface. Bring a large pan of water to the boil and add the potatoes. Boil gently for 20 minutes or until tender and easily cut with a knife.

**2** While the potatoes are cooking, caramelize the onions. Heat the olive oil in a non-stick frying pan over a low heat. Add the onions and cook very gently for about 20 minutes, stirring occasionally, until they are dark brown.

**3** Drain the cooked potatoes in a colander. Once the water has evaporated from the potatoes, return them to the pan. Add the low fat spread, milk and black pepper to the pan and mash the potatoes using a potato masher. The more you mash them, the lighter and fluffier they will be.

**4** Stir in the caramelised onion and serve with the Light steak and kidney pie on page 36.

### **Suggestions**

For a different flavour, stir 2 tablespoons of balsamic vinegar into the onions towards the end of their cooking time

## Laapsi khichdi a'la Pervin (wet khichdi with onion and tomato)

### Side dish

**Serves: 4–5**

**Prep time: 10 minutes plus 2 hours  
soaking time**

**Cooking time: 45–55 minutes**

**400g rice**

**200g moong daal/split moong bean,  
masoor daal/pink lentils or split yellow  
peas**

**2 tablespoons sunflower oil**

**1 teaspoon cumin seeds**

**1/8 teaspoon hing/asafetida**

**4 garlic cloves, minced or crushed**

**1 medium red onion, peeled and finely  
chopped**

**1/2 teaspoon turmeric**

**2–3 medium sized tomatoes, chopped**

**1/4 teaspoon red chilli powder**

**1/4 teaspoon cumin powder**

**1.2 litres water**

**1 heaped tablespoon fresh coriander,  
chopped**

Kindly provided by **Cyrus Todiwala OBE DL – Celebrity chef and patron of Pan-Indian restaurant Café Spice Namasté, UK.**

“This is a great khichdi and one that has become a favourite in our family. However my wife has perfected her very own style by trial and error based on the tastes, likes and dislikes of us all. Laapsi Khichdi does very much exist and you will often notice that much like our own home family styles vary with the exception of the onion, garlic and tomato, which are common. Laapsi is another word for wet and a bit of starch released by the rice, which gives it the texture.”

1 Wash the rice and moong daal thoroughly and soak together for up to two hours.

2 Heat the oil in a casserole, roughly a 6–8 litre type with a tight fitting lid, over a high heat. Sauté the cumin seeds and as soon as they change colour, after twenty or thirty seconds, add the hing/asafetida followed immediately by the garlic, stirring continuously.

3 As soon as the garlic changes colour to a pale brown, add the chopped onions and sauté for about 5 minutes or until the onions turn soft. Add a little water to the pan if the contents stick at the bottom.

4 Now add the soaked rice and moong daal, turmeric powder, chopped tomatoes, chilli powder and cumin powder. Continue to cook for 3–4 minutes, stirring gently from time to time, and add the water.

5 Cover and cook on a medium heat, stirring occasionally, for 30–40 minutes, ensure that you scrape from down up. For best results use a good heat-resistant plastic or wooden spatula. For this dish the rice needs to be a little overcooked so do not worry if it gets mushy, that's what Laapsi means, but if the water dries out too quickly add some more, a very little at a time.

6 As soon as the rice and the daal are cooked and the khichdi has the consistency of porridge, add the chopped coriander, stir well and remove from the heat.

7 Serve with the Chicken choyla on page 40, hot and sweet mango chutney or shredded mango Choonda, garnished with some split spring onions if you like.

More wholemeal flour means more fibre and whole grains. Experiment with greater amounts of wholemeal flour compared to white flour – you may even enjoy brown naan. #### *For the beans*

**40g dried black or red beans, washed and soaked overnight**

**3 garlic cloves, whole**

**3 celery leaves**

**1 teaspoon dried oregano**

**½ sweet pepper, diced**

**½ onion, peeled and chopped into large chunks**

**500ml water**

#### *For the rice*

**150g raw white rice (polished),**

**500ml of water**

**1 garlic clove, peeled and halved**

**½ onion, peeled and divided into big chunks**

**1 medium onion, peeled and diced**

**4 garlic cloves, peeled and very finely chopped**

**1 medium sweet pepper/capsicum, red or green, diced**

**65ml of water**

**2 tablespoons of chopped coriander or cilantro**

---

**1** Cook the beans and all the accompanying ingredients in a pressure cooker for approx 30 minutes or until soft. Drain the cooked beans and remove the onion, garlic and herbs. If you don't have a pressure cooker, bring the ingredients to the boil in a pan, reduce the heat and simmer, covered, until tender. Top up the water as needed so that the beans remain covered with water.

**2** Meanwhile, cook the rice and the accompanying ingredients in a rice cooker for 10 minutes or until the water has been absorbed and the rice is cooked. Remove the pieces of onion and garlic. Alternatively, the rice can be boiled in a sauce pan or heated in the microwave.

**3** Place the onion, garlic, half the diced pepper and water in a sauce pan and bring to the boil. Add the cooked rice and beans and mix well. Reduce the heat and gently cook for a few minutes until cooked through and the water has been absorbed, stirring from time to time.

**4** Add the coriander and the rest of the sweet pepper but do not mix. Cover the pan and turn off the heat. Leave for a few minutes to allow the pepper to warm through then uncover the pan and stir. Serve hot.

## Ginger and coconut panna cotta

### Dessert

**Serves: 4**

**Prep time: 5–10 minutes**

**Cooking time: 10 minutes plus  
refrigeration time**

**1 x 375ml tin light evaporated milk  
(1.5% fat)**

**2 tablespoons caster sugar**

**2cm <sup>3</sup>/<sub>4</sub> inch piece ginger, peeled and  
diced**

**2 teaspoons powdered edible gelatine**

**2 tablespoons hot water**

**<sup>1</sup>/<sub>4</sub> teaspoon coconut essence**

**2 passion fruit, halved**

**600 paw paw or papaya, sliced**

Reproduced with permission from Heart Food – the Healthy Heart Cookbook by Veronica Cuskelly and Nicole Senior. Published by New Holland Publishers, Australia.

This panna cotta is delicately flavoured with ginger and coconut essence to retain the lovely caramel creamy taste achieved using the evaporated milk. Increase the ginger and coconut essence if a more intense flavour is desired.

1 Place the evaporated milk, sugar and ginger in a saucepan over a low heat. Stir until the sugar has dissolved.

2 Add the gelatine to the hot water and stir until dissolved. Stir into the milk mixture and mix well (make sure the dissolved gelatine and milk are the same temperature to avoid lumps).

3 Strain the mixture into a jug, discarding the ginger. Stir in the coconut essence. Pour the mixture into 4 x 125ml capacity dishes and leave to cool. Cover and set in the refrigerator for about 4 hours or overnight.

4 Turn the panna cotta out onto serving plates – you may need to quickly dip dishes into warm water or run a knife around the edge of the dishes. Serve with passion fruit and paw paw.

### Suggestions

- Instead of passion fruit and paw paw try serving it with pineapple and lychees, papaya and lime juice or cherries and strawberries

**Dessert**

**Serves: 8**

**Prep time: 15 minutes**

**Cooking time: 20 minutes plus cooling time**  
.....

**2 oranges**

**1 lemon**

**180g ground almonds**

**4 eggs**

**170g golden caster sugar**

**80ml olive oil plus extra for greasing**

**125g self raising flour**

A delicious, citrusy cake which uses olive oil rather than butter to keep it heart-friendly. Redcurrants can be used in place of the raspberries when in season.

.....

**1** Preheat the oven to 180°C/350°F/gas 4.

**2** Put the whole oranges and lemon in a saucepan of water. Bring to the boil then reduce the heat and simmer for 15 minutes. Turn off the heat and leave the fruit to cool, sitting in the liquid.

**3** Once cooled, halve and juice all the fruit. Blend the peel of one orange and the lemon in a food processor - you will need to separate the peel from the fruit by scraping out the flesh and pith with a spoon. Add the juice from the fruit to the blended peel to make a paste, discard the remaining bits of fruit. Add the ground almonds.

**4** Beat the eggs and whisk in the sugar until pale and fluffy. Whisk in the orange and lemon paste and olive oil. Fold in the flour until fully mixed.

**5** Pour into a greased cake tin (20–22cm diameter) and bake for 50 minutes or until cooked through (cover in foil if browning too much). Leave to cool on a baking rack.

**6** Serve sprinkled with icing sugar and raspberries or redcurrants.
