

# Pizza Survey 2014 - Restaurant & Takeaway Pizza

Data table sorted by highest salt per pizza

Notes:

Salt per 100g/per slice information was collected online September/October 2014. See CASH website for further information.

Only medium takeaway pizzas collected. Where salt per pizza was not available, salt calculated from per slice information

Colour coding according to DH FoP Guidance: Green ≤0.30/100g, Amber 0.30-1.50g, red >1.50g /100g, >1.8g/portion

\* Out of home maximum per serving salt targets set by the Department of health. 4 different targets, depending on takeaway/traditional style pizza, with cure meat toppings or other toppings.

Brand Name	Product Name	Category	Slices per pizza/ portion weight (g)	Suggested Portion Size	Range/Pizza type	Food group name	Salt/100g	Salt/slice	Salt content per pizza	Meets OOH Target?
